

ARC VPoP Solution

Rapidly access a flexible and agile network ecosystem

Benefits

Expand:

Connect and grow your network to all ARC PoP locations in the Middle East.

Reduce TCO and Complexity:

Easily build your regional presence with zero upfront investment.

Bundle with connectivity :

Combine ARC VPoP with ARC connectivity to lower the cost per Mbps of traffic between VPoP's and your nearest network nodes.

Rapidly Scale:

Flexible terms and pay as you go pricing so you can scale according to your business requirement.

Time to Market:

Your new PoP will be live within hours, providing an immediate launchpad into the region.

Expert Support:

You can rely on a single partner to manage and support your vPoP end-to-end.

Having local presence all over the world is vital for carriers, content providers and service providers to stay competitive in today's business landscape.

However, this often requires heavy upfront investment, multiple complex vendor relationships, and time-consuming deployments.

ARC helps you to expand your network reach in the region quickly, seamlessly, and cost-efficiently.

We put you in control of your connectivity.

How it Works

1. Define the number of ports by location or choose to have dedicated equipment.
2. Share LOI and demarcation information.
3. We manage cross connects on your behalf.
4. We rapidly connect you to your carrier or any IX in the region.
5. You gain a fully managed service end-to-end.

About ARC

ARC is a provider of integrated network solutions that simplify connectivity to networks, data centers, cloud and interconnect platforms across the Middle East. We put customers and partners in control of their connectivity and enable them to seamlessly and rapidly deploy connectivity solutions to serve their end-customers.

Giving you the edge in the Middle East.
